

NORTH STAFFORDSHIRE CHAMBER OF COMMERCE & INDUSTRY

QUARTERLY ECONOMIC SURVEY

Quarter Ended June 2008

Introduction

This survey examines the economic climate in North Staffordshire and provides an insight into how local businesses are performing at home and abroad. As well as a summary of the key findings, we have also provided a guide to what the survey results might mean for you and your business. The survey is divided into 4 key sections:

- Marketplace – sales and capacity
- People – employment trends
- Financial Information – cashflow, investment and price indicators
- The Future – local views on business confidence

Background and methodology

The Chamber's membership was surveyed by postal questionnaire during the period 26 May to 18 June 2008. The questionnaire covered ten broad sections: activity levels; the workforce; cashflow; investment; business confidence; capacity; prices; costs, external factors and the Euro. Detailed below is an analysis of the target market surveyed.

Except where stated, all graphs have been compiled using percentage balances. These figures are determined by subtracting the percentage of companies reporting decreases in a factor from those reporting increases. The results have not been weighted and all other respondents reported no change to their businesses or expectations. All figures are rounded to the nearest whole number.

Speaking For Business – Influencing Government

For over 23 years, the Chamber's Quarterly Economic survey has provided a valuable snapshot of the North Staffordshire economy and we have used the results to lobby government and ministers on a wide range of issues. Each quarter, the results are combined with those of other chambers, regionally and nationally, to produce economic data which is highly respected by a wide range of organisations, including the Bank of England and the Treasury, our MPs, government departments and other agencies whose activities impact on the prosperity of North Staffordshire.
